Upper one-sided 0.10 significance levels; two-sided 0.20 significance levels; 90 percent percentiles. Tabulated are critical values for the F distribution. The column headings give the numerator degrees of freedom and the row headings the demoninator degrees of freedom. Lower one-sided critical values may be found from these tables by reversing the degrees of freedom and using the reciprocal of the tabled value at the same significance level (100 minus the percent for the percentile).

Table 1: Critical values (percentiles) for the F distribution.

| | | | | | | | | | erator | | | | | | | | | | |
